

I have always believed the purpose of government is to help improve people's lives. I am dedicated to making a difference in Eureka Springs in my third term as your mayor. Equally important is updating the technology available to provide useful resources that benefit Eureka's residents.

Our website reflects our ideals and commitments to our community. It is an important tool that can simultaneously streamline government services while enhancing the strong connection and exchange of information between city government and our residents and visitors.

Thank you for visiting!
